

# VENUS WHITE PAPER

## VENUS

### The First Living Canine Deployed as an On-Chain Digital Asset

Issued by UK Financial Ltd

Version 1.0

---

## Executive Summary

VENUS is a digital asset created by UK Financial Ltd as part of the Maya Meme's ecosystem. Unlike traditional meme tokens that rely solely on speculation, VENUS is built around a real-world identity, a living canine named Venus, whose image, story, and digital presence form the foundation of the project.

VENUS represents loyalty, protection, strength, and community. The project introduces a new category of blockchain assets where real-world identities and digital ownership combine to create long-term brand value.

VENUS serves as the Premier Division asset within the Maya Meme's League Structure and acts as the flagship meme asset of the ecosystem.

---

## The Origin of VENUS

The Maya Preferred Project was established in 2018 by UK Financial Ltd and has evolved into a broad blockchain ecosystem that includes asset-backed tokens, regulated security tokens, and digital infrastructure.

Following the success of MayaCat and the development of the Maya Meme's framework, UK Financial Ltd introduced VENUS as the first living canine deployed on the blockchain.

VENUS is not an artificial character created for marketing purposes. VENUS is a real dog whose identity, image, and digital legacy form the basis of the project.

The objective is to create a recognizable digital asset brand supported by a real-world identity and long-term ecosystem development.

---

## Vision

The vision of VENUS is to transform the concept of meme assets from short-term speculation into long-term digital brands.

VENUS seeks to demonstrate that community-driven digital assets can possess:

- Real-world identity
  - Corporate stewardship
  - Transparent blockchain verification
  - Long-term ecosystem expansion
  - NFT integration
  - Cross-platform community engagement
- 

## Token Information

Token Name: Venus

Symbol: VENUS

Blockchain: Ethereum

Standard: ERC-20

Total Supply: 500,000,000 VENUS

Contract Address:

0x50EaE8c782D476386C271DBee094Bf6B2040130C

Issuer:

## Token Utility

VENUS is designed to serve multiple functions within the Maya Meme's ecosystem.

These include:

- Community participation
- Digital collectible integration
- NFT ecosystem expansion
- Promotional campaigns
- Future ecosystem rewards
- Brand licensing opportunities
- Marketplace participation
- Community governance initiatives

As the ecosystem expands, VENUS may become the foundation for future Maya Meme's digital asset projects.

---

## The Maya Meme's League Structure

The Maya Meme's ecosystem operates through a progression-based model.

Entry Division

Maya Minors

Early-stage digital assets enter the ecosystem through the Maya Minors platform.

Rookie Division

Projects demonstrating growth and community engagement may advance to the Rookie Division.

Premier Division

VENUS serves as the Premier Division asset and represents the highest level within the current Maya Meme's framework.

---

## **NFT Integration**

Alongside the VENUS token, UK Financial Ltd has developed a limited NFT ecosystem.

The NFT structure consists of:

1 Genesis NFT

99 Founder NFTs

400 Core Collection NFTs

Total NFT Supply: 500

The Genesis NFT represents the original digital record of Venus and serves as the foundation of the NFT collection.

---

## **Security and Transparency**

UK Financial Ltd maintains a commitment to transparency through public blockchain verification.

Key principles include:

- Public contract visibility
- On-chain supply verification
- Corporate wallet transparency
- Blockchain-based ownership records
- Community access to transaction history

All VENUS token activity can be independently verified through Ethereum blockchain explorers.

---

# Roadmap

## Phase 1

Token Creation

Smart contract deployment

Community launch

Website launch

NFT development

Completed

---

## Phase 2

Exchange Integration

Market development

Community expansion

Brand growth

Completed

---

## Phase 3

NFT Marketplace Expansion

Enhanced digital collectibles

Partnership initiatives

Community events

In Progress

---

Phase 4

Maya Meme's Ecosystem Expansion

Additional characters

Expanded league structure

New digital asset releases

Future development

---

## Risk Factors

Digital assets involve significant risk.

Market volatility, regulatory changes, technology risks, and liquidity conditions may impact token value.

Participants should conduct independent research before acquiring any digital asset.

Nothing in this document constitutes investment, financial, or legal advice.

---

## Conclusion

VENUS represents a new approach to digital assets by combining a real-world identity, blockchain technology, community engagement, and long-term ecosystem development.

As the first living canine deployed as an on-chain digital asset, VENUS establishes the foundation for a new category of character-driven blockchain projects within the Maya Meme's ecosystem.

Family. Loyalty. Evolution.

VENUS Has Entered The Blockchain.
